

Customer Journey Map

Phase of Journey	Stage 1: Receiving the Application	Stage 2: Assessing & Deciding	Stage 3: Delivering the Outcome
Actions <i>What does the customer do?</i>	• Opens the new applicant's submitted form • Logs the application into the queue • Gathers the applicant's supporting documents	• Reviews income, employment, and credit history • Cross-checks payment history for red flags • Weighs the overall risk manually	• Records the final approve/reject decision • Notifies the applicant or forwards to next step • Files the application for audit records
Touchpoint <i>What part of the service do they interact with?</i>	• Internal application intake system • Applicant's submitted paperwork	• Credit bureau records • Internal risk assessment sheets	• Internal decision log • Applicant notification system
Customer Thought <i>What is the customer thinking?</i>	• "Another one in the queue." • "Do I have everything I need?"	• "Is this person actually reliable?" • "I hope I'm not missing something."	• "I hope this is the right call." • "How many more do I have left today?"

Customer Feeling <i>What is the customer feeling?</i>	Neutral, slightly rushed	Anxious, uncertain	Relieved, but cautious
Process Ownership <i>Who is in the lead on this?</i>	Credit Analyst	Credit Analyst (sometimes escalated to senior reviewer)	Credit Analyst / Compliance
Opportunities <i>How can we improve this stage?</i>	• Auto-collect applicant data through a web form • Reduce manual data entry	• "Is this person actually reliable?" • "I hope I'm not missing something."	• Instantly notify the applicant through the app • Keep a clean digital record automatically
