

Initial Project Planning Template

Date	5 th july 2026
Team ID	RAHMA HUSSEIN JUMA
Project Name	CREDIT CARD APPROVAL PREDICTION
Maximum Marks	5 Marks

Product Backlog, Sprint Schedule, and Estimation (4 Marks)

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members	Sprint Start Date	Sprint End Date (Planned)
Sprint-1	Data Collection	USN-1	As a developer, I can source and download the applicant and credit history datasets so the pipeline has real data to work with.	2	High	Solo	26-june-2026	28-june-2026
Sprint-1	Visualizing & Analysing	USN-2	As a developer, I can import libraries and read the dataset so that I can begin exploring it.	1	High	Solo	26-june-2026	28-june-2026
Sprint-1	Visualizing & Analysing	USN-3	As a developer, I can view univariate distributions (income, age, gender, income type, education) so that I understand the applicant population.	2	High	Solo	26-june-2026	28-june-2026
Sprint-1	Visualizing & Analysing	USN-4	As a developer, I can view multivariate relationships (correlation	2	Medium	Solo	26-june-2026	28-june-2026

			heatmap, income by education/gender) so that I can spot patterns relevant to risk.					
Sprint-1	Visualizing & Analysing	USN-5	As a developer, I can view descriptive statistics and missing value counts so that I know what needs cleaning.	1	Medium	Solo	26-june-2026	28-june-2026
Sprint-2	Data Pre-processing	USN-6	As a developer, I can drop duplicate rows/features so the dataset has no redundant records.	1	Medium	Solo	29-june-2026	1-july-2026
Sprint-2	Data Pre-processing	USN-7	As a developer, I can handle missing values so incomplete records don't break the model.	1	High	Solo	29-june-2026	1-july-2026
Sprint-2	Data Pre-processing	USN-8	As a developer, I can clean and merge the two datasets and build the binary risk label so the data is ready for training.	3	High	Solo	29-june-2026	1-july-2026
Sprint-2	Data Pre-processing	USN-9	As a developer, I can engineer features (age, years employed) so the model gets meaningful numeric inputs.	2	High	Solo	29-june-2026	1-july-2026
Sprint-2	Data Pre-processing	USN-10	As a developer, I can encode categorical values so the model can process non-numeric fields	2	High	Solo	29-june-2026	1-july-2026
Sprint-2	Model Building	USN-11	As a developer, I can train and compare Logistic Regression, Decision Tree, Random Forest, and XGBoost so I can identify the best-performing	3	High	Solo	29-june-2026	1-july-2026

Sprint-2	Model Building	USN-12	As a developer, I can save the best model, scaler, and column list so they can be reused without retraining.	1	High	Solo	29-june-2026	1-july-2026
Sprint-3	Application Building	USN-13	As a user, I can enter my details into a web form so I can request a prediction.	2	High	Solo	2-july-2026	4-july-2026
Sprint-3	Application Building	USN-14	As a developer, I can build the Flask backend so submitted form data is processed and passed to the model.	3	High	Solo	2-july-2026	4-july-2026
Sprint-3	Application Building	USN-15	As a user, I can view my approval/rejection result and risk category so I understand the outcome.	1	High	Solo	2-july-2026	4-july-2026
